

BUSINESS COMPUTER APPLICATIONS SEMESTER TEST 2 PROJECT

First, look over all of your web pages and make sure that every page has a title, at least one picture, text describing the picture or page, a home button on every page except the home page, your final choices for backgrounds, font colors, etc. Make changes, if needed, to make it look its best.

Then on your digital photography page, insert the pictures that we took with digital cameras in your webpage (Macro Photo in light box and Macro Photo out of light box, your best rule of thirds photo). Describe each picture in photography terms. Aim for 3-5 sentences for each photo. In another cell of the table, explain what Rule of Space means in photography and how it makes a better photo. You may use handouts to help you with your explanations, but make sure you use your own words.

On the PhotoShop page in a cell at the bottom of your table, insert text to reflect on your top three favorite PhotoShop assignments and why they are your favorite. Aim for 3-4 sentences for each assignment.
