

# Alphabet Photography

## Procedure:

**Read:** <https://www.digitalartteacher.com/blog/alphabet-photography>

1. **Identify:** Explain how this technique might be useful in your own photography.
2. **Take your shots:** (26)
  - a. Take **creative** shots of objects that show each letter of the alphabet.
  - b. Take **LOTS** of pictures. Each letter should be found, not created. They need to be objects that were not originally intended to be letters.
  - c. Take **quality** shots. Ensure it's not blurry, crooked, too dark, too light, etc.
  - d. Take a **"good"** picture. Pay specific attention to **balance** and **avoiding mergers** for this assignment. Be sure to check that there's nothing in your background. The images need to be clear and crisp with no distracting parts (no mergers).
3. **Write a caption:** in 1-3 sentences that explain this project to someone who has never taken a photography class before.

## Grading:

- **Creativity:** Is your image unique, or does it look like others? Did you try unusual viewpoints or methods?
- **Craftsmanship:** Did you turn in a quality shot? Or is it blurry, crooked, too dark, too light, etc.?
- **Composition:** How did you use the rules of composition in your images? Did you sufficiently display each letter of the alphabet?
- **Caption:** Did you write 1-3 sentences that explain this project to someone who has never taken a photography class before?
